"Ones best success comes after their greatest disappointments"
Henry Ward Beecher

Elysium Project was born from the collaboration of 9 people who, after having worked diligently in managing the community of one of the most sensational successes of the Italian coin panorama, find themselves to start something innovative and far-sighted.

The idea is simple, to help all those interested or even companies who want their own token for speculative purposes and more. how?

- 1) programming the token smart contract
- 2) forming and managing the community
- 3) create a marketing program
- 4) and finally by flipping the coin on the market

The first step to implement this program was first of all to create a proprietary token in which to subsequently convey all the proceeds from the sale of our services to future customers, thus Elysium Coin was born, the token on which to "try" all our ideas, a beta-tester.

"Ones best success comes after their greatest disappointments"
Henry Ward Beecher

We have created the community, dozens of telegram groups from the most various countries in the world, each managed by one or more mother tongue admins, we have included the Elysium brand in all the major social networks, from Facebook to Instagram, from Reddit to Tik Tok.

We applied marketing by investing several BNBs in sponsorships on the most varied advertising channels, collecting a lot of useful data for which investment plan had had a greater image and purchases by new owners.

We collided with a negative convergence of the market during the launch phases, but we still managed to have an excellent start thanks to the listing in the first 48 hours on the two largest and most important sites in the sector which immediately led us to multiply the initial value 27 times!

The experience in token management has helped us more to understand that to carry out our project efficiently we need something in, a different and more "advanced" contract, thus the idea of bringing Elysium Coin to a next level, a real "version 2" with a new contract, new name and logo, Elysium Planitia.

Obviously this radical change will not have repercussions on our holders who will automatically receive the same giving, on the contrary it will attract new investors being the V2 as a new launch in all respects and also giving the possibility to buy the "Planitia" also through the platform of Paypal.

The contract will also provide for the possibility of an automatic "repurchase system" with which liquidity will be introduced whenever there is a price reduction of at least 5%, all technical solutions tested to offer our customers increasingly performing tokens.

However, Elysium Planitia will also be linked to a metaverse, stay tuned!

ELYSIUM PROJECT

Roadmap

"Ones best success comes after their greatest disappoinments"
Henry Ward Beecher

Q1 2022 • Launch of the new token *Elysium Planitia PLY*

- BUSD Pool
- Aggressive marketing

Q2 2022 • launch of a token on behalf of a company, work already acquired

- implementation of the purchase of PLY by credit card
- Listing of PLY on top 50 exchange

Q3 2022 • Launch of ElysiuMetaverse

Q3 2022 • Launch of ElysiumMetaverse

A major new Elysium project is to launch its own metaverse, a place a few thousand kilometers away ... directly on the planet Mars! The ambitious project will be divided into the following phases:

- open an NFT marketplace
- buy and sell the Mars lands
- launch the metaverse game

Our holders will have the opportunity to buy the lands on Mars to cultivate them, exploit them and build their own civilization, as well as resell or exchange everything on the NFT marketplace.

The game will then give you the opportunity to interact with other players to collaborate in the colonization of Mars, conquer other lands and to test yourself to prove who is the best player! There will be continuous airdrops to receive portions of land and useful accessories to develop their civilization.
